### WHY CHOOSE HUNTSMAN TO PROTECT YOUR CLOUD SERVICE

Huntsman is ideal for cloud and service monitoring as it builds on its origins in complex, multi-domain, sensitive environments like defence, intelligence, financial services and telecoms.

Below are some of the advantages of the Huntsman Cloud Edition.

#### Speed

- Real-time, high-volume activity processing for platforms, infrastructure and applications
- Ease of deployment, expansion and customisation to fit the elastic nature of cloud service delivery
- Flexible architecture and high scalability to meet changing needs

#### Security

- Robust data separation, role-based access control and multi-tenancy support
- Comprehensive audit capability across all operator activity
- Easy segmentation of customer data and reports

#### Usability

- In-built, continuous compliance monitoring and reporting
- Incident management workflow support and drill-down investigation capabilities
- Automated response to mitigate attacks, safeguard systems and protect data

#### Efficiency

- Low TCO, fast ROI and short learning curves for staff
- Easy demonstration of service capability to build credibility with customers
- Lower set-up and operational costs and simplified service differentiation

#### Advanced Threat Detection and Intelligence

- Real-time correlation combined with (optional) patented 'True' Behavioural Anomaly Detection to provide more advanced monitoring services.
- The ability to add-on threat detection based on externally available sources of known risks, attack origins and indicators of compromise across a wide service and customer portfolio – enabling truly intelligent value added services.

### MULTI-TENANCY

- Huntsman provides full, multi-tenancy capability for Cloud providers within its data model.
- This allows separate of customer monitoring data throughout its lifetime.
- Huntsman's access control functions provide for the creation of organisations or system communities, which ensures clear separation between cloud customers, applications and data sets.

### ENHANCEMENT OPTIONS

- To make it even more powerful, the Huntsman Cloud Edition comes with these enhancement options:
- Behavioural Anomaly Detection for advanced identification of unknown and unknowable threats
- Threat Intelligence for more accurate threat detection
- Extended data repository
- High Availability
