

## Huntsman Security Joins the Cisco Solution Partner Program

**SAN FRANCISCO – May 27, 2015** – Huntsman Security® announced that it has joined the Cisco Solution Partner Program as a Solution Partner. The Internet of Everything (IoE) continues to bring together people, processes, data and things to enhance the relevancy of network connections. As a member of the Cisco Solution Partner Program, Huntsman Security is able to quickly create and deploy solutions to enhance the capabilities, performance and management of the network to capture value in the IoE.

"The Cisco Solution Partner Program offers an exciting new opportunity for Huntsman Security as we expand our operation into the U.S.," said [Peter Woollacott](#), **Huntsman's CEO and co-founder**. "Huntsman is a pioneer in cyber security detection, analysis and automated threat management. To coincide with this announcement, we have released our game-changing [Huntsman Analyst Portal™](#) in the U.S., which automatically manages and correlates the increasing amounts of information necessary for quick and accurate threat resolution. By automatically collecting relevant threat information from Cisco and other threat sources, the Huntsman Analyst Portal verifies and streamlines the threat management process to dramatically ease and simplify the tasks faced by SOC operatives today."

"Solutions like Huntsman Security help organizations better manage security threats. Effective security requires clever people, smart technology and appropriate processes. Datacom TSS has the people and knowledge to deliver security-focused outcomes through our Advanced Cyber Security and Incident Response Centre using specialist solutions, like Huntsman Security, under our trusted partner model," said Richard Byfield, Managing Director, Datacom TSS.

The Cisco Solution Partner Program, part of the Cisco Partner Ecosystem, unites Cisco with third-party independent hardware and software vendors to deliver integrated solutions to joint customers. As a Solution Partner, Huntsman Security offers a complementary product offering and has started to collaborate with Cisco to meet the needs of joint customers. For more information on Huntsman Security, go to: [Cisco Solution Partner Program Catalog profile](#).

## **About Huntsman Security**

Huntsman Security – whose parent Tier-3 was founded in Sydney, Australia – is a cyber-security pioneer that developed and patented behavior anomaly detection (BAD) technology to anticipate and prevent cyber attacks. With more than a decade of deployment in mission-critical security environments, national intelligence, border protection, banking and infrastructure, Huntsman offers military-grade protection that proactively detects indicators of compromise and allows companies to resolve issues in real-time. Huntsman is deployed in complex, diverse environments across the world, and has offices in North America, Australia, the UK and Japan.

The Huntsman Cyber Security Platform correlates internal and externally sourced threat information at high speed, automating routine pre-analysis and processing to contextualize diverse data sets and prioritize threats that matter. Using rules and behavior based engines – rather than relying only on ad hoc query-led data investigation or industry-based patterns – Huntsman combines machine learning with proven statistical algorithms to instantly and accurately isolate risky anomalies. This process is based on an organization's unique data dynamics and provides precise, actionable intelligence for incident response in seconds.
